

## CIRCULAR No2f/05-12-2012

### CATEGORY: TECHNICAL ISSUES & TECHNICAL DATA FILES

**Announcement:** One (1) complementary file - as requested by participants\_– is available for downloading at the section “Additional Downloads” (December 05, 2012):

1) *The Protected Area of the Trilogy.pdf*

According to our ‘Additional technical & morphological clarifications’ (30/10/2012), ‘particular attention should be paid to the surroundings of the “Trilogy”, on Panepistimiou Street, since the courtyards and the gardens of the three buildings are designed in continuity with their architecture and are listed together with the structures.’ In order to clarify the ambiguities regarding the status and extent of protected ‘Trilogia’ buildings and their annexes, and to further assist participants in deciphering the list of decrees already issued, please refer to the attached pdf extract. Elements included in the shaded area are subject to specific legislation regarding heritage protection; they belong to institutional bodies and are not subject to the architectural competition, which is limited in the public space only. Particularly, the shaded area of the courtyards can only be altered after the approval of a number of institutional boards, while any approved modifications will still require the consent of the legal tenders. In any case, there can be no prior commitment of the government that proposed modifications will be accepted, even if they make part of a competition winning entry. Since the result of such a petition may not be a positive one, the above items can be deemed as ‘excluded’ from the area of intervention. This topic may be later re-addressed by the contractual design team.
